Art Unit: 1746

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Medlock or Kohler et al.

Re claim 1 for example, note that Medlock and Kohler disclose a cleaning liquid container (12 in Medlock and 2 in Kohler) for cleaning an object with an inlet (36 in Medlock and 51a, 51 in Kohler) provided on the housing, an outlet (46 in Medlock and 47 in Kohler) a filter element (48 in Medlock, 49 in Kohler) and a sedimentation line (the respective flow path of Medlock and Kohler). Since the claim body fails to recite any limitation to give life and meaning to the preamble, the preamble has not been given the effect of a limitation. See MPEP 2111.02

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Medlock or Kohler et al.

Claim 19 defines over the applied prior art only in the recitation of the cutter head as claimed. Nonetheless, as claimed the intended use fails to structurally define over the structure of Medlock and Kohler.

Art Unit: 1746

5. Claims 10-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Japan'343, Neil Jr., Eliason et al., Goffardo, shakeri, Petter et al., Key, Zademach, Albertson, Hunter et al., Morton, Taylor and Brooks, note the cleaning means.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (703) 308-0661.
